We have a very limited focus under the NESHAPS. Basically they have to meet our requirements for radon emissions from the mine, which our analysis shows that they do. We don't have any specific authority beyond that. Of course we are open to suggestions.

Clancy- The Air Division is reviewing an Application to Construct for a uranium mine near the Grand Canyon. Shelly provided an update to Linda and others, but I wanted to make sure you were aware of it. Let me know if you want more information.

Subject: FYI: Action on Canyon Uranium Mine

All – FYI

The Air Division / Air Toxics, Radiation and Indoor Air office is reviewing a NESHAP application to construct/modify the Canyon uranium mine located south of the Grand Canyon. The application was received July 6th and under the NESHAP it should be approved or denied by September 6th. See the Background information attached. ATRIA and the Tribal office invited the Kaibab, Hualapai and Havasupai to consult on the location of the nearest members of the public. To date we have received no comments from the tribes. Subpart B of the NESHAP limits the dose to the maximally exposed individual to under 10 millirem/year. With the nearest individual being about 4.5 miles away, the modeled doses are well below the standard. (b) (5)
